

crescent moon

Wed, 05 Dec 2018 17:21:00 GMT crescent moon pdf - The crescent symbol is primarily used to represent the Moon, not necessarily in a particular lunar phase. When used to represent a waxing or waning lunar phase, "crescent" or "increscent" refers to the waxing first quarter, while the symbol representing the waning final quarter is called "decrecent". Wed, 05 Dec 2018 16:38:00 GMT Crescent - Wikipedia - The star and crescent is an iconographic symbol used in various historical contexts but most well known today as a symbol of the former Ottoman Empire and, by popular extension, the Islamic world. It develops in the iconography of the Hellenistic period (4th–1st centuries BCE) in the Kingdom of Pontus, the Bosphoran Kingdom and notably the city of Byzantium by the 2nd century BCE. Sat, 08 Dec 2018 05:22:00 GMT Star and crescent - Wikipedia - The figure of the moon as it appears in its first or last quarter, with concave and convex edges terminating in points. Something shaped like a crescent, especially: A curved pastry. A curved street, often presenting a continuous facade, as of row houses.
